UI/UX Design
Wireframing
Prototyping/Mockups
Interaction Design
Responsive Design
Design Systems
Component Libraries
Advanced SCSS
Frontend Development
Agile Development
A/B Testing
Usability Testing
Photo Editing
Digital Marketing

Experience

UI Developer | American Chemical Society

May 2023 - Present

Focused on UI development embedded in the UX Design team, centered on AEM component implementation, frontend fixes, and authoring support.

Developed and refined responsive AEM components using HTML, SCSS, JavaScript, React and Git. This included a robust card component with a multitude of layout states and advanced configuration, as well as a Section component with configurable background shader options, and many things in between.

Created a custom, AEM-embedded experience that leveraged GSAP and three.js for soft-animation storytelling, visual effects, interactive timeline and more.

UI/UX Designer + Developer | Rowmark

May 2019 - February 2023

Designed and developed websites, ecommerce UI/UX, layouts, elements, and landing pages. Redesigned core ecommerce components for a high-traffic website, including Checkout, Navigation, Account Pages, Homepage, PDP, and PLP.

Contributed to Magento 1.9.x to 2.0 migration through bug testing, fixing, and SCSS overhaul. Created additional web experiences and resources, such as product explorers and design guidelines.

Web Design Intern | Rowmark

May 2018 - May 2019

Designed, prototyped and built websites, ecommerce UI/UX, layouts, elements, landing pages and more. Led the design process of the parent company's new website, as well as the HTML/SCSS.

Communication
